

Our Philosophy!

We believe scholars in elementary school should experience a highly enriched curriculum to discover their passions and turn them into strengths. For this reason, all of our scholars partake in the Visual and Performing Arts (VAPA) and science during the school day. However, for our scholars who wish to pursue these areas in greater depth, we offer the Art Conservatory and STEM Institute after school for Grades 2-6. This is separate from GOALS for GOALS Academy. However, scholars in GOALS for GOALS Academy may participate in the Art Conservatory and STEM Institute. Areas include:

Musical Theater
Piano/Keyboard
Strings, Brass, & Woodwinds
Visual Art
STEM (Science, Technology, Engineering, and Math)

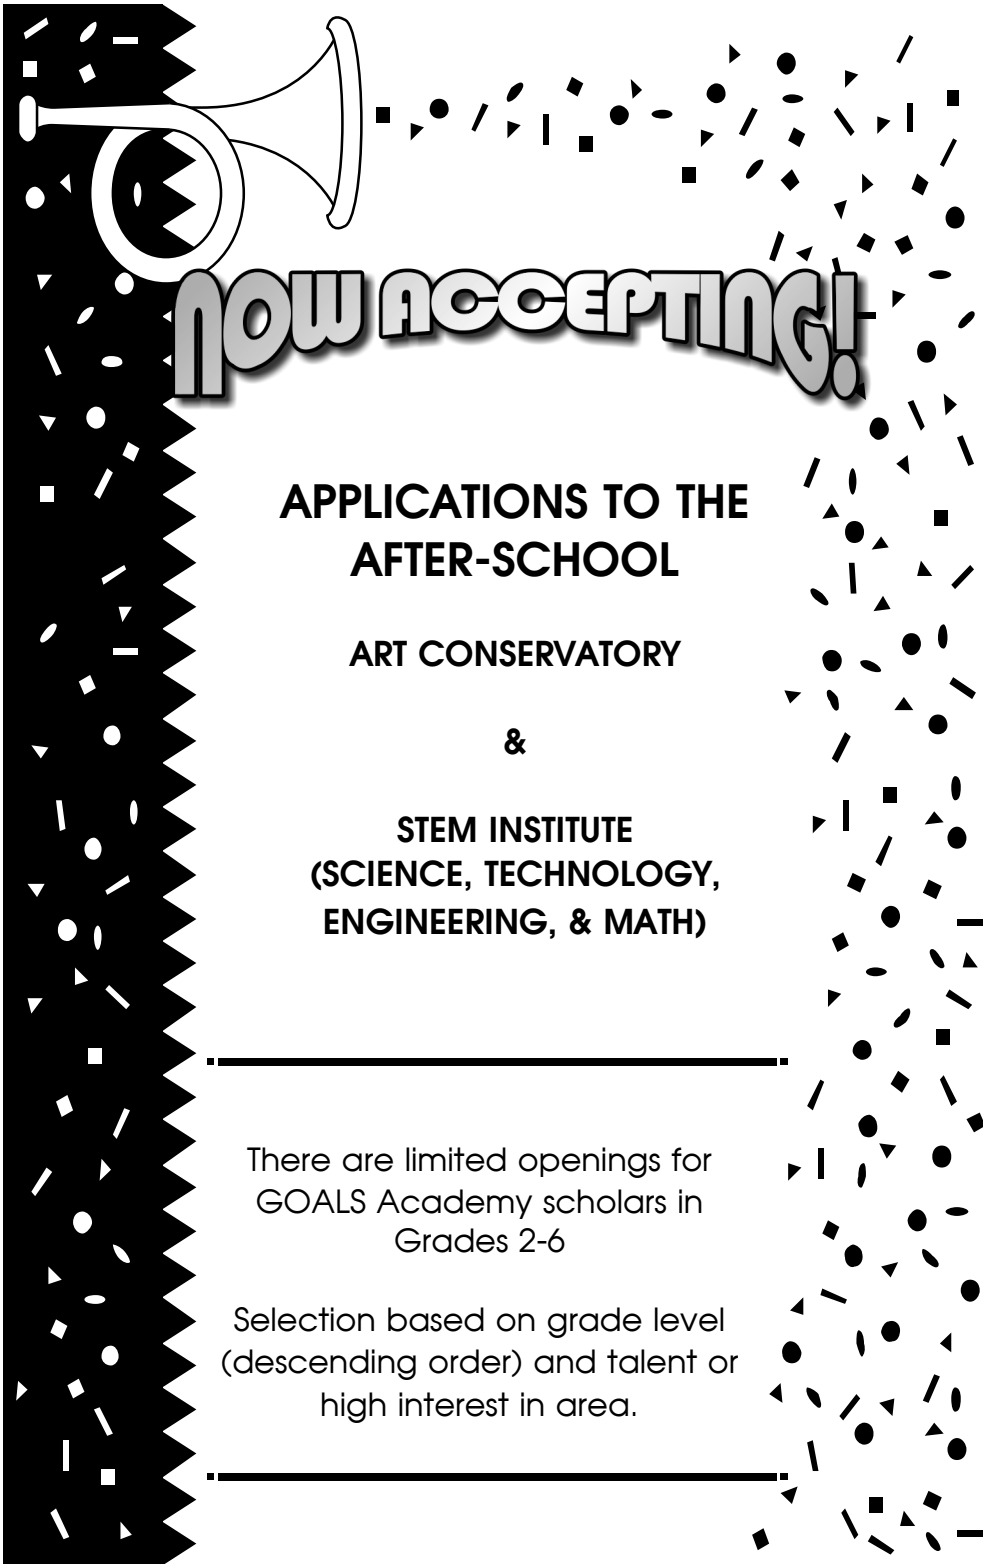

Interest/Talents + Character + Mentoring = Strengths

Deep practice X 10,000 hours = world-class skill

Deep practice 3 hours a day = world-class skill in less than 10 years

Deep practice is different from practice – You have to be fully in the moment!

3 hours of T.V./video games or 3 hours of deep practice in an area of interest – Which is more beneficial?

NOW ACCEPTING!

**APPLICATIONS TO THE
AFTER-SCHOOL
ART CONSERVATORY
&
STEM INSTITUTE
(SCIENCE, TECHNOLOGY,
ENGINEERING, & MATH)**

There are limited openings for GOALS Academy scholars in Grades 2-6

Selection based on grade level (descending order) and talent or high interest in area.
